

graphics, by mitab

Ambitious and passionate design producer Mitab kicks-off 2015 with new products by young Swedish designers Daniel Svahn, Jonas Wagell and HOWL Design Studio.

Row of, design by Daniel Svahn

Row of is a storage cabinet for the contemporary office. Designed to counter the often stiff and sterile office environment with a more dynamic aesthetic, Row of is a colourful and versatile addition to the Mitab collection. Row of comes in 4 different widths (140, 170, 190 and 220 cms) and 3 heights (80, 90 and 110 cms) that can be combined to create different cabinet combinations. Standard colour configurations will be available, however customers can also specify their own unique colour combinations using the NCS colouring system.

Cluster, design by Jonas Wagell

The Cluster table series with its rounded corners and bold graphic silhouette is a typical Jonas Wagell design expression - soft, inviting and industrious. Developed to support the Cumulus seating products and the Tonic easychairs, Cluster comes in two standard table tops and 4 different heights of 42, 52, 62 or 72 cms. Available in standard colours, clients can specify their own RAL colours for the metal base and Mitab will automatically match the colour of the ash table top.

Cumulus 5K, design Jonas Wagell

Cumulus 5K (K is for "kant" which means 'sides' in Swedish) is developed for waiting and lounge areas where you want to create a dynamic yet soft environment, using different heights and shapes of the furniture. The 5-sided shape was chosen because it is more accessible and inviting. The new Cumulus pouf broadens the series, and along with the new Cluster table, creates a multitude of creative opportunities.

Transfer, design HOWL Design Studio

Transfer is a modern, graphically clear beam sofa for environments where people are on the go. Transfers identity find themselves at the interface between visual lightness and weight. Prudent and simultaneously characterful with its clear profile. Transfer is based on an integrated aluminum beam that forms the center of the seat, back and legs. Transfer comes with 2-, 3- or 4-seats. Seating elements can easily be switched for a table or a height adjusted disabled seat. Armrest is optional as is the choice of colour and fabric.

All products are available at Mitab's stand B10:21. Digital press materials can be requested by e-mail to cissi.johansson@mitab.se or at the information counter in the stand.

PASSION CREATES GREAT THINGS
